MARCH NEWS

THE OFFICE OF INTERNATIONAL AFFAIRS NEWSLETTER

Xiamen University Malaysia (XMUM) has always been in great collaboration with Cardiff University (CU) since 2018. The ultimate goal is to expand the international exposure of our students, providing them with the opportunity to enrich their academic career at a world-class university.

Today, we are happy to share that new postgraduate programmes have been added to the 3+1 and 4+1 Postgraduate Study Pathways. The new programmes added are as follows:

XMUM Programmes	CU Programmes
Bachelor of Science in Marine Environmental Chemistry (Honours)	MSc Big Data Biology
Bachelor of Engineering in Cyber Security (Honours)	MSc Cybersecurity
Bachelor of Engineering in Data Science (Honours)	MSc in Data Science and Analytics
Bachelor of Engineering in Artificial Intelligence (Honours)	MSc Artificial Intelligence MSc Artificial Intelligence with Professional Placement Year
Bachelor of Management in E-Commerce (Honours)	MSc in Business Management MSc in Business Management with Professional Placement Year MSc Business Strategy and Entrepreneurship MSc Marketing MSc Human Resource Management MSc International Human Resource Management MSc International Management MSc Logistics and Operations Management MSc Sustainable Supply Chain Management MSc Maritime Policy and Shipping Management

On 2 March 2023, Xiamen University Malaysia (XMUM) officially formed a partnership with the University of Auckland (UOA). A Postgraduate Study Pathway was established to enrich students' overseas experience, giving XMUM engineering students the opportunity to further their studies in the Master of Engineering Studies and Master of Engineering at UOA.

The Master of Engineering Studies Programme provides engineering students with the opportunity to expand their existing theoretical and practical skills. On the other hand, the Master of Engineering Programme allows students to develop a sense of independence and confidence in their ability to think critically and conduct fundamental or applied research.

In the near future, this collaboration will be continued with a greater variety of choices in the field of engineering, providing students with better opportunities to enrich their personal experience through the lens of education.
